

# Case Study

Polished Concrete Floor

## St Margaret's Church, Portsmouth

### PROJECT DESCRIPTION

St Margaret's is no ordinary church. Part of the Anglican Diocese of Portsmouth, St Margaret's is a community church looking towards the future, reimagining what the Church's role is in the 21st century.

Offering food through its food pantry and clothing from its community shop, St Margaret's Community Church was renovated in 2020 and transformed into a thriving community hub. As part of the renovation, Lazenby Contracts installed a HATCRETE Iron Grey polished concrete floor with underfloor heating powered by green energy. The new floor has transformed both the building and the way it is used by the community.

### PROJECT REQUIREMENTS

HATCRETE supplied 500m<sup>2</sup> of Iron Grey Colour Hardener for the installation of a polished concrete floor.

### PRODUCTS USED

HATCRETE Colour Hardener – Iron Grey
