

Case Study

Integrally Coloured Concrete
& Precast Walling

The Regent Cinema, Redcar

PROJECT DESCRIPTION

The Regent Cinema opened in late 2022 following a £9.6 million redevelopment by Merlin Cinemas on the site of the former cinema, which was demolished due to structural issues. BAM Construction led the development of the new seafront building in Redcar, including a large underground basement area.

HATCRETE Redcar Sand Adcolour was supplied to Poundfield Precast for the manufacture of the precast concrete panels. The HATCRETE technical team also visited the site to monitor production from the plant through to slab installation.

PROJECT REQUIREMENTS

HATCRETE supplied 254m³ of Redcar Sand Adcolour for the precast panels surrounding the underground basement area and upper-level structure.

PRODUCTS USED

HATCRETE Adcolour – Redcar Sand

PARTICIPANTS

- Client – **The Regent Cinema**
- Contractor – **BAM Construction**
- Precast Manufacturer – **Poundfield Precast**
- Integral Colour Supplier – **HATCRETE**
