

# Case Study

Bitter Briar Colourmix Integrally Coloured Concrete

## The Buttermarket - Redruth

### PROJECT DESCRIPTION

The Buttermarket in Redruth, Cornwall, is a restored complex originally built in 1825. Once a thriving meat market, it played an important role in developing Redruth's identity as a bustling market town. In 2025, following a £4 million renovation led by Redruth Revival CIC and supported by the Architectural Heritage Fund (AHF), the Buttermarket was transformed into a vibrant cultural and community hub featuring a food hall, retail units, co-working spaces, and a venue for live events.

As part of the renovation, a 200m<sup>2</sup> exposed aggregate floor was installed to enhance the courtyard's functionality and aesthetic appeal. HATCRETE supplied Colourmix in Bitter Briar, which complements the historic architecture while providing a durable surface for a high foot traffic area.

### PROJECT REQUIREMENTS

To supply 19m<sup>3</sup> of Bitter Briar Colourmix for the external exposed aggregate paving in the Buttermarket courtyard.

### PRODUCTS USED

- HATCRETE Colourmix - Bitter Briar

### PARTICIPANTS

- Client – **Redruth Revival CIC**
- Main Contractor – **Jewell Construction**
- Concrete Supplier – **Maen Karne Concrete Products**
- Integral Colour Manufacturer – **HATCRETE**
